The day before crew change—calm seas ?

 **10:17**

A certificate will expire

When? Does it matter? Can they sail?

 **13:35**

A flight is canceled

Will crew make it on time?

 **16:01**

The second officer is sick

Who can be ready by 07:30? Has she led an evacuation drill on this type of vessel?

WHEN DATA & SYSTEMS ARE DISCONNECTED

AI will answer confidently, but it may be wrong

Q: "Who is ready to sail at 07:30 and has led an evacuation drill on this type of vessel?"

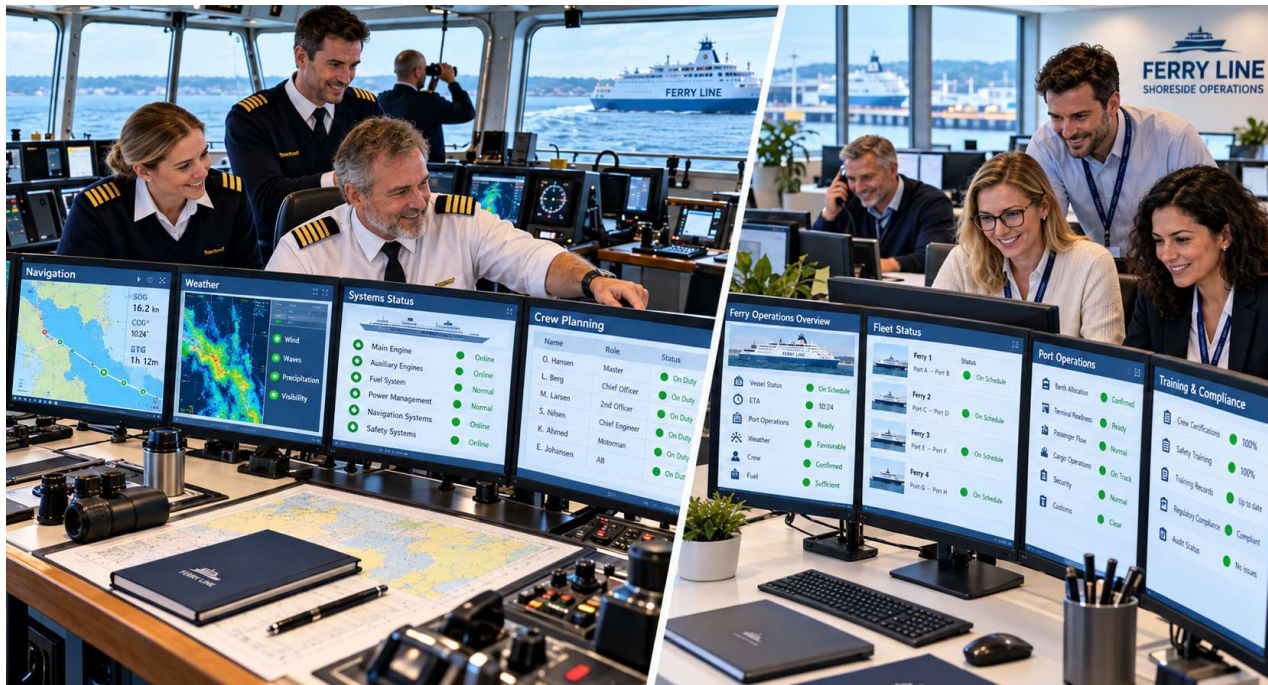

AI: "Anna can sail"

Her certificate expired last week

CUSTOMER STORY: WHEN DATA & SYSTEMS ARE CONNECTED

Now, rotation data, certs, & skills in a connected profile

Q: "Who is ready to sail at 07:30 and has led an evacuation drill on this type of vessel?"

AI: "Jennifer is certified, available, and has experience with this evac system."

Ready to sail

CONNECTED DATA AND SYSTEMS LET YOU CONDUCT STRATEGIC WORKFORCE PLANNING

Plan ahead, instead of just managing the next crisis

6 months

Staffing

"Where will we be potentially short-staffed next summer?"

12 months

Promotion

"Who is six months or less from promotion, and what training do they need to achieve it?"

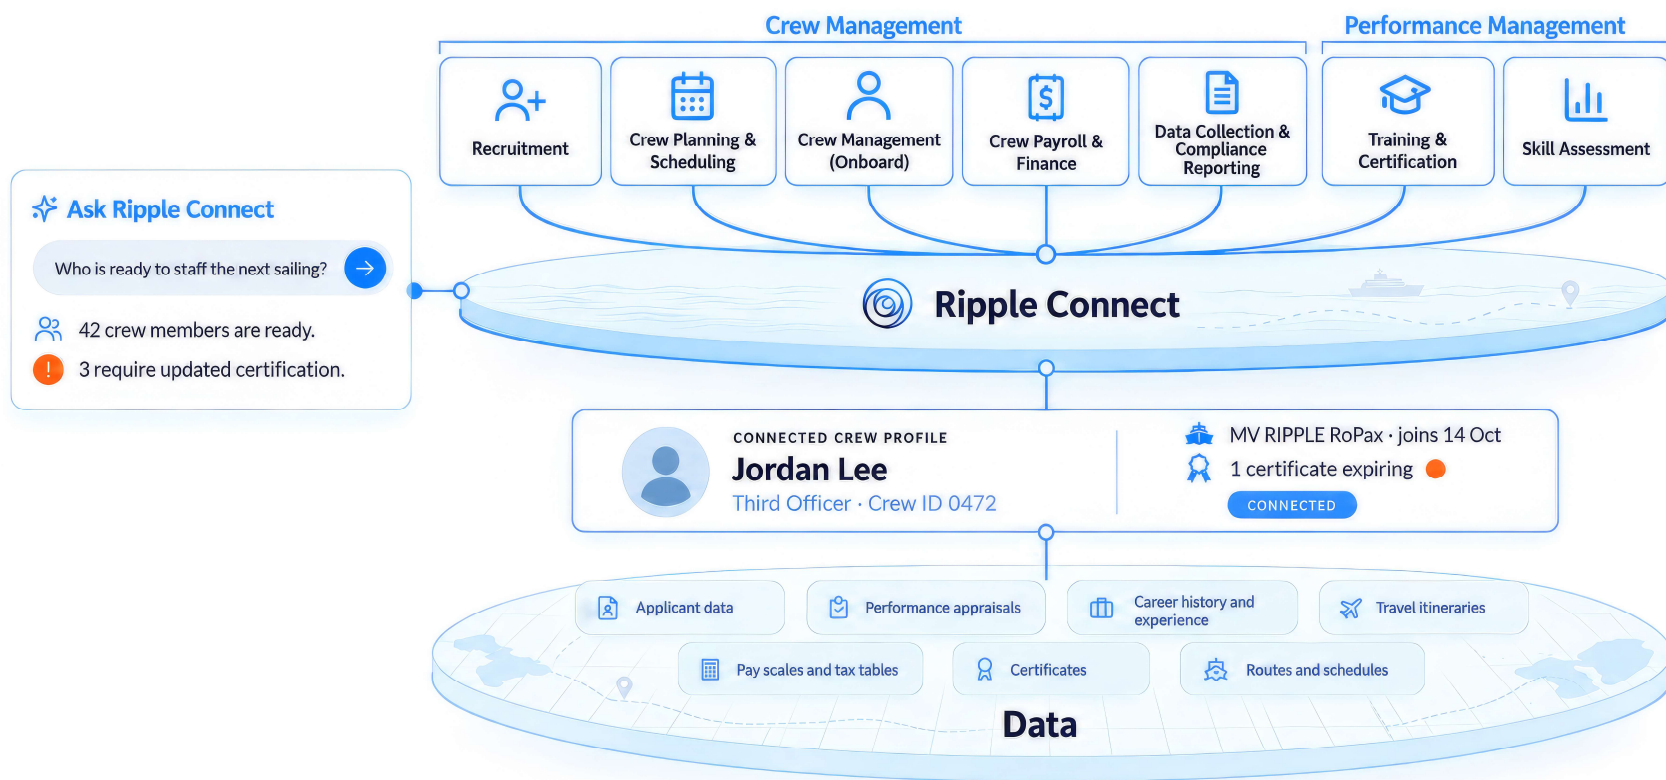

18 months

Preparation

"Which crew members are ready for the new battery-electric catamarans joining the fleet?"

RIPPLE CONNECT

Configured to your workflows

If AI is in your plans for next year, start with one question: what have you connected?
